

Refer us to your clients, and keep the relationship.

IT providers, insurance brokers, accountants: your small-business clients ask you about cybersecurity. We audit, explain in plain language and support them. You stay their first point of contact.

IT providers

An independent audit your clients and their insurers take seriously. The fixes come back to you, or we do them with you, on-site.

Insurance brokers

We help your clients answer the cyber insurance questionnaire accurately and close the gaps (MFA, offline backups...) before renewal.

Accountants and advisers

Banking-detail fraud, Law 25, incidents: send your clients to a free consultation.

How it works

01

You introduce us

A simple three-way email.

02

Free consultation

30 min with your client, by video or on-site in Greater Montréal.

03

Quote, then audit

Fixed price before we start. With consent, we share the priorities with you.

What we do

- Cybersecurity audit
- Penetration testing (with written authorization)
- Microsoft 365 and Google Workspace review
- Law 25 compliance
- Fixes done by us, on-site or remotely
- Ongoing support (vCISO)

Our commitments

- We never contact your clients unless you introduced them.
- No active testing without a signed mandate and written authorization.
- The report belongs to the client: shared with you only if they wish.

Free, to share

- Online flash audit
- DMARC, SPF and DKIM checker
- Law 25 incident register template
- Sourced guides and glossary
